

WPW PROFESSIONAL CUTTING TOOLS

WPW Countersinks for Festool Machines

Countersinks with special shank – Compatible with Festool® CENTROTEC® chuck.

These Countersinks complete the original Festool programme, adding essential Carbide Countersinks.

New Economical Countersink & Stop Bits

TCT Countersink with low friction Depth-Stop

New economical Line.
The perfect choice for DIY!

Precise Countersink Depth Adjustment.

Adapter with a Micrometric stopper for TCT Countersinks.

The threaded adapter design enables depth fine-tuning for standard WPW Countersinks / Counterbores.
1mm pitch allows 0.1mm depth accuracy.

35 mm Hinge Boring bits with depth-stopper

Prevents damaging the door.
Simple depth control.

Guitar Building Tools

Binding/Rabbeting Set

The sets include five different bearings that allow producing 10 different rabbets from just 1.0mm rabbet up to 5.5mm (in 0.5mm increments).

Mission Impossible? Not Anymore

Mini Straight Template Bits can do it!

At last, top bearings can be the same diameter as the shank or even smaller. Templates can be produced the same size as the finished workpiece. A very important feature on routing complex shapes when small cutters are needed.

Smaller Bearings & Smaller Cutter

Nano Router Bits - When size matters

4.8mm Ball Bearing guide - Smallest in the market. Look for the NB logo and find a selection of profiles. You now have access to those tight spaces and sharp corners where regular tools won't go.

**More Cutters / Flutes
Better Surface Finish &
Longer Tool life!**

3 & 4 Flute bits - a comprehensive selection of unique tools.

Eliminates the time-consuming hand-filing and sanding that normally follows routing with 2 fluted tools in hard materials.

Need to flatten exotic timber?

Carbide Tipped Surfacing Bit

Used to resurface or plane machines Spoilboard.
Also, used when unusual timbers need to be flattened before they can be used.
For use in Router machines and CNC machines.
3 & 4 flutes for smooth surface finish.

One tool - many applications

Slot & Undercut Bit with Variable Depth

For general slotting and undercutting. Suitable for flooring.

Exchangeable bearings enable different depths of cut. Available with 3mm, 4mm, 5mm and 6mm slotting cutters.

Can be used in CNC (with no bearing) or in router machine.

Need a longer Tool but cannot find?

Shank Extension Adapters

For CNC and Router machines. Allows deeper reach for wide range of applications. Very useful when the bit is too short for the job.

New line for SOLID SURFACE materials

Solid Surface (Corian®) Router Bits

Widely used for producing kitchen countertops as well as in other applications.

A special Low Friction Delrin® Bearing Assembly protects the material surface, to achieve a clean surface.

Diamond Tipped PCD Router Bits

Designed for CNC machines, these tools last 30- 50 times longer than Carbide tipped tools. Very efficient in cutting a wide variety of tough abrasive materials including composites, particleboard, MDF (either raw or laminated), HPL, veneers and hardwoods.

More Applications

Diamond Coated Router Bits

For cutting fiberglass, carbon fiber and other composite material.
